☎️ 9765834391

Final-year Bachelor of Information Technology (BIT) student with a strong interest in Artificial Intelligence, Digital Transformation, Data Analytics, and Technology Innovation. Through academic coursework and projects, gained experience in AI concepts, research, technical documentation, software development, networking, and IoT systems. Demonstrated ability to analyze information, prepare reports, collaborate in teams, and communicate technical ideas effectively. Seeking an internship opportunity to apply technical and research skills while contributing to digital, data, and AI initiatives that create meaningful impact.

EXPERIENCE

Artificial Intelligence & Digital Innovation

- Completed undergraduate coursework in Artificial Intelligence, Machine Learning, and Data Analytics.
- Researched AI applications for digital transformation and decision-making systems.
- Developed analytical and problem-solving skills through AI case studies, projects, and technical presentations.
- Evaluated emerging AI technologies and their potential impact on public services, innovation, and development initiatives.
- Prepared research-based reports and presentations on AI concepts and practical applications.

PROJECT

1. Federated Learning Hub-Based Framework for Privacy-Preserving Machine Learning
Final Year Project (Proposed)
 - Researching federated learning techniques for decentralized AI model training.
 - Exploring privacy-preserving machine learning frameworks.
 - Studying aggregation algorithms and distributed learning architectures.
 - Conducting literature review and system design for secure AI applications.
2. Simulated Water Quality Notifier (IoT Project)
 - ESP8266, Sensors, Web Dashboard
 - Developed an IoT-based monitoring system using ESP8266 and environmental sensors.
 - Implemented real-time sensor data collection and notification mechanisms.
 - Designed system architecture for remote monitoring and alert generation.
 - Integrated cloud/dashboard visualization for data tracking.
3. Online Grocery Delivery System (Software Engineering Project)
 - Performed requirement analysis and system specification documentation.
 - Designed use cases, functional requirements, and software architecture.
 - Developed UML diagrams and system workflows.
 - Applied software engineering principles to solve real-world business problems.
4. Network Design and Security Project
 - Cisco Packet Tracer
 - Configured VLANs, subnetting, routing, and network security policies.
 - Implemented LAN infrastructure with routers and switches.
 - Performed network testing and troubleshooting.
 - Documented network architecture and connectivity results.
5. Machine Learning & Artificial Intelligence Coursework
 - Studied supervised and unsupervised learning concepts.
 - Worked with classification, prediction, and data analysis techniques.
 - Explored expert systems, knowledge representation, and intelligent agents.
 - Applied AI concepts through academic assignments and practical exercises.

AWARDS & CERTIFICATION

- Successfully organized and managed a college-level futsal tournament.
- Completed multiple academic projects in networking, software engineering, and IoT.
- Presented technical reports and project findings in academic settings.
- Maintained active participation in technology-related coursework and project activities.
- Developed practical understanding of Artificial Intelligence and Machine Learning through BIT curriculum and independent learning
- 3 Months React with Javascript course at Vrit technology

EDUCATION

- 🎓 Primary Education | Times School
SEE 2078 Batch
3.70 GPA
- 🎓 +2 | Khwopa collage
2078-2080
GPA 3.30 physics
- 🎓 Ongoing Bachelor| Nilai University
Bachelor in IT , Padmashree Collage

TECHINALSKILL

Python
Java
HTML, CSS, JavaScript
MySQL
Cisco Packet Tracer
IoT (ESP8266, Sensors)
Machine Learning Fundamentals
Artificial Intelligence Concepts
Data Analysis
Git & GitHub

Soft Skills

Research & Documentation
Problem Solving
Team Collaboration
Presentation Skills
Project Coordination
Analytical Thinking
Communication Skills

LANGUAGES

- English
- Nepali
- Hindu
